

Product Information

Glass Baskets

Product Overview & Key Features

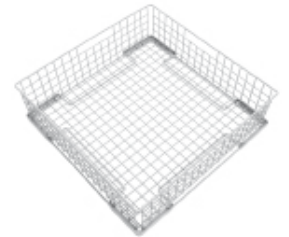

With many different styles of glassware in constant use in commercial bars and kitchens, it's essential that you choose the right basket to wash them in. Clenaware Glass Washing Baskets come in a range of different sizes and styles which have been designed with each individual style in mind.

Each size and style of basket comes with a premium plastic coating and have plastic corner clips fitted, making them more durable to general wear and tear, this therefore can prolong the life of the basket. The spaces between the wirework ensure the water from the wash and rinse jets in the glasswasher, have a larger area to get through and results in glasses that are washed and rinsed correctly and thoroughly.

Clenaware Glass Washing Baskets are available in 400mm, 450mm and 500mm sizes, and also come in a range of styles and functions.

Open Glass Baskets

The Open Glass Basket is suitable for glasses that measure up to 150mm in height, such as Pint Glasses, Tumbler Glasses, Half Pint Glasses and Hi-Ball Glasses. The basket comes with offset hand slots which make it easier to handle and transport. It is also coated in 'Premium' plastic coating for added hygiene and durability.

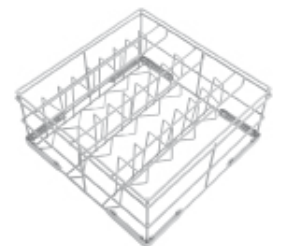

Divided Glass Baskets

The Divided Glass Basket is suitable for specialist style glasses that measure up to 150mm in height, such as Shot Glasses, Cocktail Glasses, Champagne Glasses and Wine Glasses. The basket is compartmented and angled to aid the drying process and to prevent glass damage or breakages.

Tall Glass Baskets

The Tall Glass Basket is suitable for 'Continental' style glasses that measure over 150mm in height. This includes glassware such as Pilsner glasses, Heineken and Peroni glasses. The basket is compartmented and angled to aid the drying process and also has special support inserts which sit inside the glass. The support insert safely accommodates the taller style glass and protects it from breakages, where glasses would otherwise fall over while in the glasswasher.
